

ST. BERNARDS HEALTHCARE

Our mission is to provide Christ-like healing to the community through education, treatment and health services.

St. Bernards Medical Center is the flagship facility of St. Bernards Healthcare and is the leader in healthcare services in the region. With the largest medical staff – more than 200 physicians, including 84 new doctors within the last five years alone – St. Bernards serves as the regional referral center for a 23-county area of Northeast Arkansas and Southeast Missouri. It is licensed for 438 beds and has been serving residents of the region for well over a century. St. Bernards is the leading provider of comprehensive heart care, cancer treatment, women and children and senior services.

St. Bernards developed the first true cancer center in the region more than two decades ago and was the first healthcare provider to create an extensive Health & Wellness program melding fitness programs with medical services that support lifestyle changes for better overall health. St. Bernards was included in the Arkansas Business inaugural class of “Best Places to Work in Arkansas.”
